EXPERIENCE

Freelance Software Engineer & Web Developer

Self-Taught / Project Work

📅 10/2022 - Present

🌐 <https://kevaughn-b.github.io/>

- Designed and developed full-stack software and web projects using Python, JavaScript, and other modern frameworks.
- Visit my Portfolio Website for more information.
- Some of my projects listed below.

Smart Budgeting App

- Developed a full-stack web application to track spending and help create budgets, using FastAPI, PostgreSQL, Python.
- Supporting multi-user income, expense, and budget tracking.
- A responsive dashboard with financial analytics and data visualization.
- Enabled users to log and categorize expenses in under 10 seconds with real-time budget tracking and instant spending insights.

Personal Portfolio Website

🌐 <https://kevaughn-b.github.io/>

- Personal Portfolio Website - HTML5, CSS3, JavaScript, Git.
- Showcases projects, technical skills, and professional background.
- Created clean layouts, cross-device responsiveness, basic accessibility, contrasts, and keyboard navigation.

Grocery List Android App

- Grocery List Android App - Java, Kotlin, Firebase, Android Studio
- Developed a mobile app for offline/online grocery list planning
- Integrated Firebase for cloud sync, authentication, and data storage

AI Student Academic Assistant

Northern Caribbean University

- AI Student Academic Assistant - Python, Flask, HTML, CSS, JavaScript
- Built an AI academic platform that provides intelligent question answering, personalized recommendations, and PDF text extraction
- Leverages NLP and web APIs for real-time academic assistance

Executive Assistant to the Vice Principal

Northern Caribbean University

📅 09/2023 - Present

- Supported the Vice Principal with admin tasks: managed correspondence, organized student and staff documentation.
- Maintained confidentiality while handling sensitive information related to student affairs, administrative, and institutional matters.
- Managed student and staff records, processing documentation, and organizing digital files.
- Supported the coordination of university events and student logistics.

EDUCATION

B.Sc. in Information Technology

Northern Caribbean University

📅 01/2021 - 08/2026 📍 Mandeville, Jamaica

- Website Design & Implementation
- Data Structures & Algorithms
- Systems Administration & Engineering
- Fundamentals of Information Systems
- Upgrading & Repairing A Technological System
- Cybersecurity

GPA

3.3 / 4.0

SUMMARY

Software engineer with experience in web and mobile application development. Proficient in Python, JavaScript, Java, C#, relational databases, cloud deployment, and the implementation of REST APIs. Knowledge of industry practice, teamwork, and solving real-world problems and learning new technologies quickly in a production environment.

SKILLS

Technical Skills
